

# Are hackers using your computer?

## Secure servers and cyber attacks

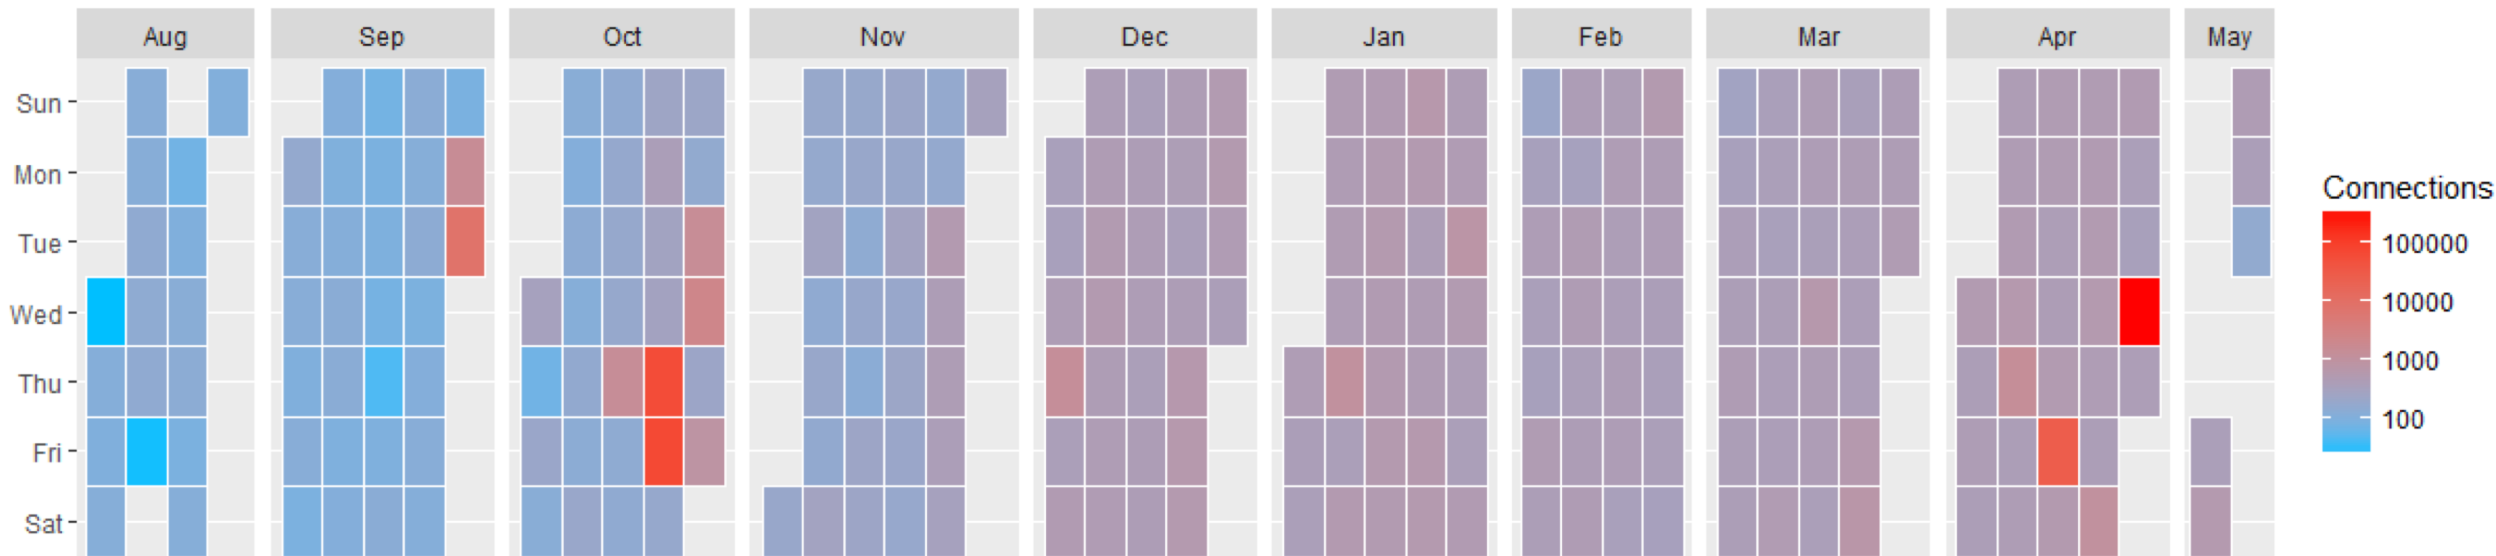

source: OECD

The Resolute Mean

# Cyber Activity

- Heat calendar indicates two peaks in the number of connections in October 2014 and April 2015
- Hypothesis: the shares of Russian, Chinese and Brazilian IP addresses will increase during a DDOS attack, but the shares of Dutch and American IP addresses will not increase much

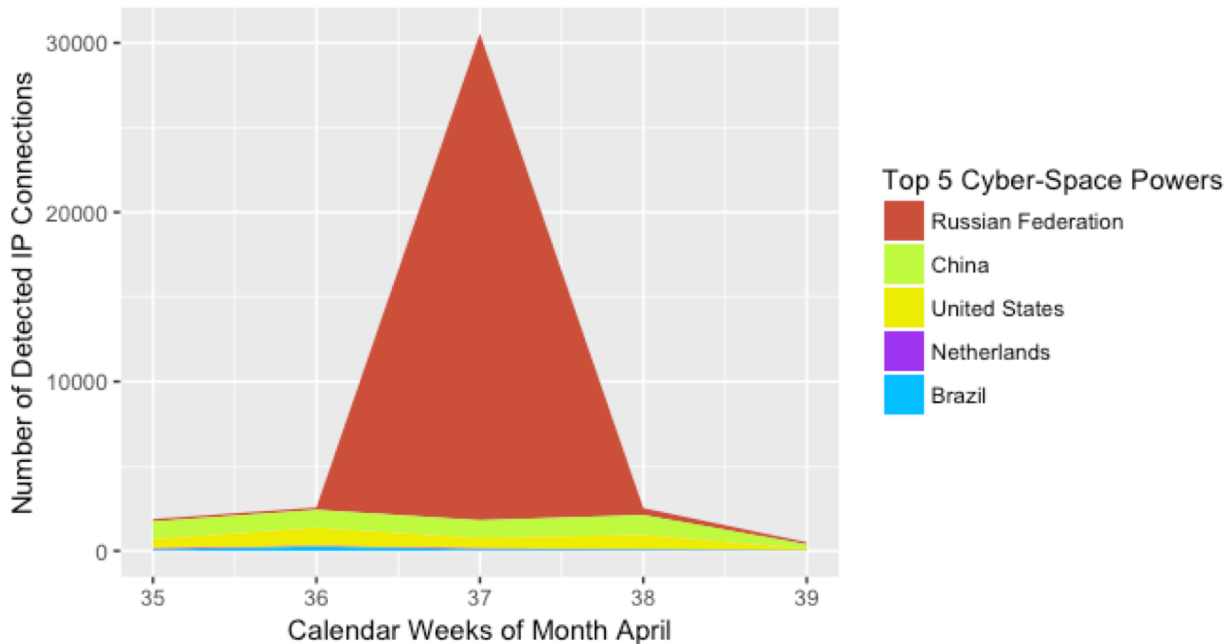

Distribution of attacks over time

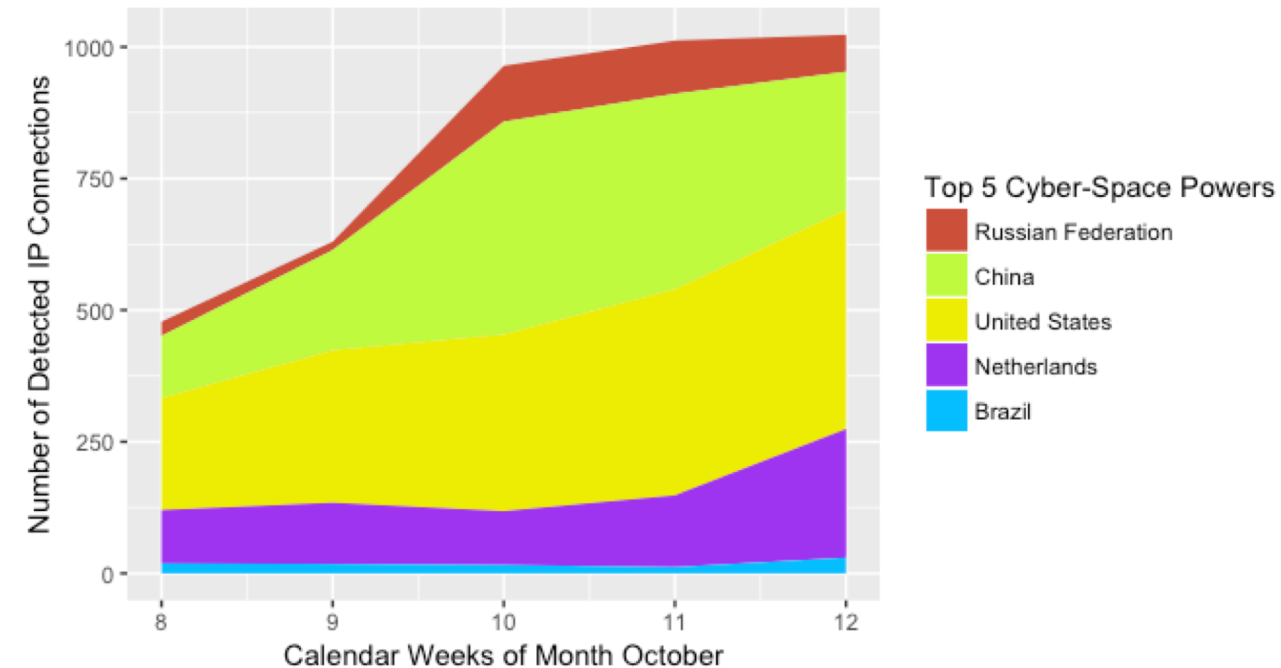

# Cyber Activity across Top 5 Countries

- April peak: share of Russia increases, other countries' shares remain approximately the same

Share of Detected IP Connections by Country

Share of Detected IP Connections by Country

- October peak: shares of Russia and China increase, other countries' shares remain approximately the same
